

Involving the Community

Ark Energy's approach

Ark Energy appreciates the importance of engaging, listening to and involving community members and other local stakeholders throughout the project's development, and ensuring that local priorities and concerns are considered.

Ark Energy's approach to consultation is informed by the International Association for Public Participation's (IAP2) Core Values, Code of Ethics and Public Participation Spectrum, widely accepted as the industry benchmark. It is open, inclusive, responsive, accessible and transparent.

The company is also signatory to the Clean Energy Council's *Best Practice Charter for Renewable Energy Projects*, a voluntary commitment to engage respectfully with communities, be sensitive to environmental and cultural values, and make a positive contribution to the regions in which we operate.

We are focused on providing opportunities for interested community members and stakeholders to participate, and maximising opportunities for the local community to benefit from the project in meaningful ways.

We value input from local community members and community consultation is ongoing. There are many ways to stay informed, provide feedback and participate in the process, and where possible the community's input is incorporated into project plans to improve outcomes and lasting benefits.

Ways to stay informed & participate

Website

The project website - richmondvalleysolar.com.au - provides up to date project information, maps, previously issued newsletters.

Project newsletters

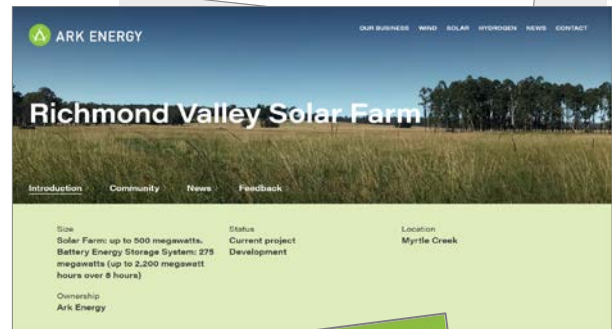

Project newsletters are issued regularly and available by post and email.

To receive newsletters by email register online at arkenergy.com.au/mailling-list-details.

To receive newsletters by mail, please send your postal address and a request to be added to the mailout list to info@richmondvalleysolar.com.au.

We respect your privacy and your details will only be used for this purpose.

All previously issued newsletters are also available under the 'News' feed on the project website, richmondvalleysolar.com.au.

Community information sessions

Details of information sessions and when these are scheduled are included on the website and in project newsletters.

Community benefit sharing

The project will contribute significant funding annually, from the start of construction and for the life of the project, to provide meaningful and lasting benefits for the nearby community.

There is also a Neighbour Benefit Sharing Program for those who own a dwelling close to project infrastructure. If you think you may be eligible, please contact the project team.

Tell us what's important for Richmond Valley Solar Farm's community benefits

The Richmond Valley Solar Farm will contribute significant funding annually, from the start of construction and for the life of the project, to provide meaningful and lasting benefits for the nearby community. Ark Energy has proposed to contribute \$850 per installed megawatt (MW) of solar electricity generation each year (annual amount based on final installed capacity).

It is intended that this funding will:

- **Share** benefits with the local community.
- Make a **meaningful contribution** to issues the community cares about.
- Be **flexible** to focus on changing priorities over time.
- Ensure the project is a **positive, rewarding** and **beneficial** development for the local community.

We're keen to hear from community members and other local stakeholders about their recommendations and ideas on priorities for this funding. Input is welcome and can be emailed directly to the project team - contact details below.

Questions and feedback welcome at any time

Questions and feedback are welcome at any time.

Please send your comments directly to the project team via email.

We appreciate all input and will do our best to respond to you as quickly as possible.

Ark Energy's engagement goals & commitments

Ark Energy's goals for community engagement include to:

- Ensure community members are well informed and kept up to date on project status and developments.
- Obtain feedback and provide ample opportunities for community members to communicate their views, concerns and aspirations for the project.
- Address any community member's issues or concerns promptly.
- Work to avoid and minimise the impacts and maximise the benefits of the project for the local community.
- Wherever possible utilise input from community members to optimise the design of the project.

Ark Energy commits to:

- Be proactive – connect early in the process and regularly share information so community members know what is happening and how to interact with the project team and provide feedback on the project.
- Be transparent – be honest and ethical in our dealings with all.
- Seek solutions – engage to understand, explore and collaborate on ways to avoid and minimise impacts and maximise the benefits of the project.
- Be flexible and inclusive – ensure that our engagement provides opportunities for all interested community members to have access to information and members of the project team.

Local community information sessions for the Richmond Valley Solar Farm.
