

Western Plains Wind Farm Photomontage

PM4 - Photomontage view from Dovecote Road (Jimmy Lane Memorial Lookout)

Approximate distance to closest visible wind turbine T1 is 3,180 metres

Photomontage location plan

Legend

-  Approximate photo location and indicative view direction toward Western Plains Wind Farm turbines
-  Proposed Western Plains Wind Farm wind turbine
-  Location of other photomontage viewpoints

General Notes: Photo location PM 4

Coordinates: Easting 354763, Northing 5486961

Elevation: 74m AHD

Viewpoint Elevation: 77m AHD including the lookout platform

Camera: Nikon D700, 50mm 1:1.4D Lens

Original Page Format - A1 Landscape

Turbine Dimensions: 150m tip height, 82m hub height and 136m rotor diameter.

Viewpoint PM4 is illustrated at a view angle of around 74 degrees which is within the central, binocular field of human vision. The direction the photomontage view is facing, is north west to north.

Closest visible turbine indicated by red line.

A photomontage from this location is included in the Landscape and Visual Impact Assessment.

* The purpose of this Photomontage is to provide a 'representation' of the possible visual impact of this project for the purpose of discussion. The layout is subject to change in accordance with the planning process. These images give a reasonable impression of the scale of turbines and the distance to turbines, but due to vegetation screening and the complexity of working off useful landscape features, they cannot be 100% accurate. A static image cannot convey turbine movement, different lighting, weather and seasonal conditions that vary through time and resolution of image.
