

Boulder Creek Wind Farm

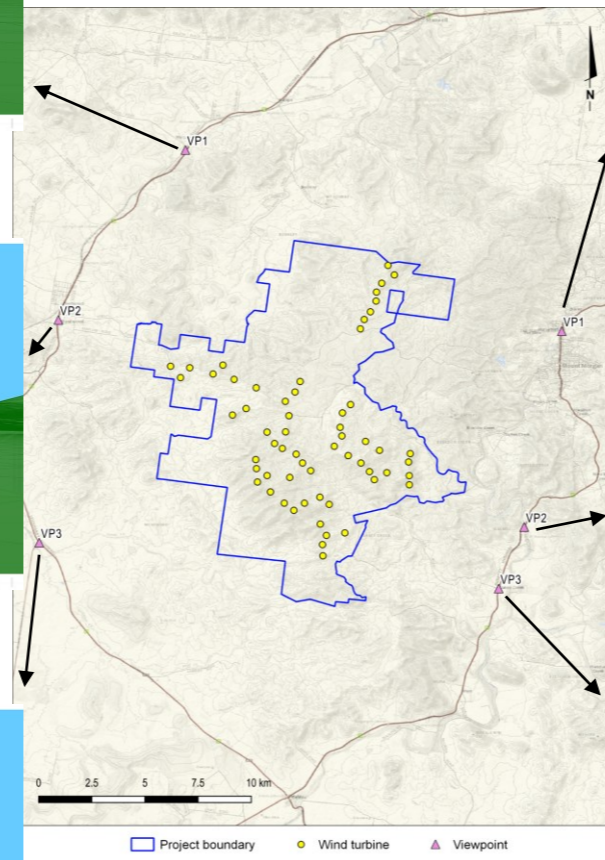

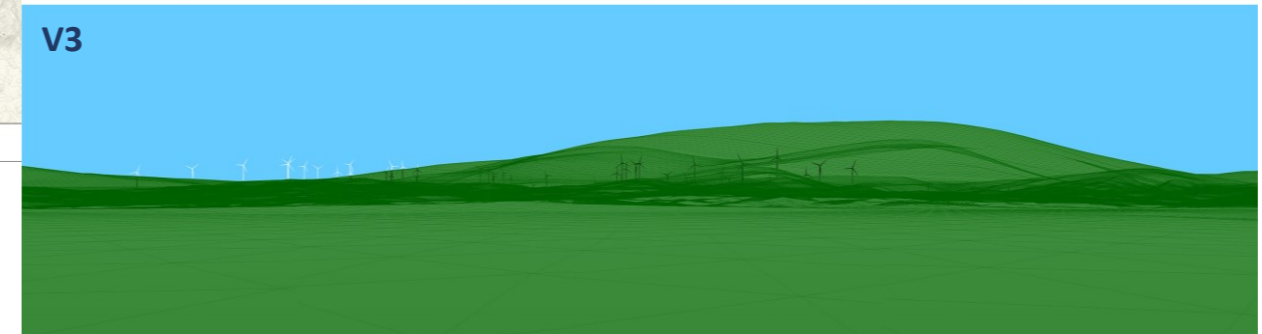

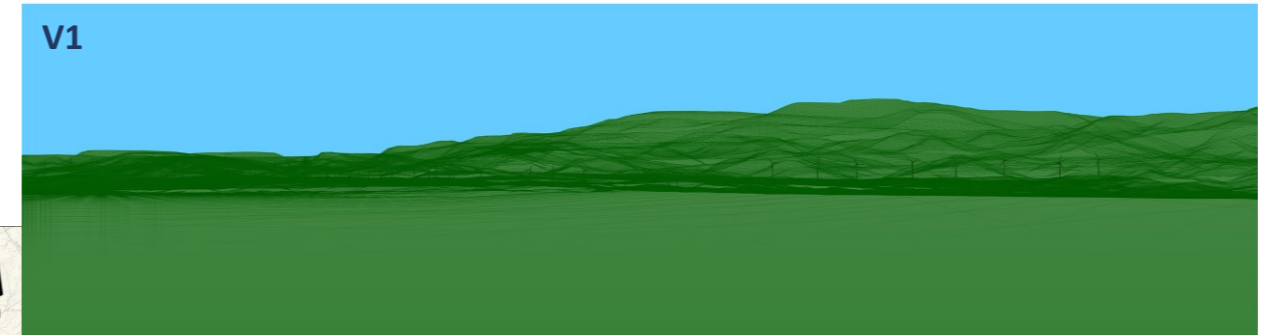

Wireframes to show the view from locations on the Capricorn and Burnett Highways

White turbines are visible, black turbines are obscured and not visible.

Viewpoints from A4 and A5 Capricorn Highway, Westwood side

Viewpoints from A3 Burnett Highway, Mount Morgan side

Wireframes are a digital representation of the landscape including the proposed wind farm from a chosen location. They are compiled using specialist industry software and based on precise distances and wind turbine dimensions to ensure an accurate and true to scale representation.
